

TETRAGON

TETRAGON FINANCIAL GROUP LIMITED (TFG)

PERFORMANCE REPORT FOR Q1 2008

April 22, 2008

Tetragon Financial Group Limited (TFG) is a Guernsey closed-ended investment company traded on Euronext Amsterdam by NYSE Euronext under the ticker symbol "TFG".

In this quarterly update, unless otherwise stated, we report on the consolidated business incorporating TFG, Tetragon Financial Group LP and Tetragon Financial Group Master Fund Limited.⁽¹⁾ References to "we" are to Polygon Credit Management LP, TFG's investment manager.

Q1 2008 results at a glance:

- ❖ **Overview:** The portfolio performed well during Q1 2008 as income and cash flow generation continued to be strong and earnings per share remained stable throughout the quarter.

Financial Results:

- ❖ **Net Income:** Consolidated net income was \$45.9 million in Q1 2008.
- ❖ **Cash Receipts:** The investment portfolio performed solidly in the first quarter as our investments generated approximately \$74 million in cash receipts.
- ❖ **Earnings per Share:** EPS for Q1 2008 was \$0.36.
- ❖ **Net Assets and NAV per Share:** Consolidated net assets grew by approximately \$25 million quarter on quarter, ending the period at \$1.29 billion. At the end of Q1 2008, NAV per share stood at \$10.25.
- ❖ **Dividend:** On April 21, 2008 the Board of Tetragon Financial Group Limited declared a dividend of \$0.15 per share in respect of Q1 2008, which will be payable on May 19, 2008. Please refer to the website (www.tetragoninv.com) for additional details regarding the dividend, including the Optional Stock Dividend Plan.
- ❖ **IRRs:** Despite the fall of 3M LIBOR, the weighted-average IRR on TFG's CLO investments was down only slightly at 16.0% as of the end of March 2008, compared with 16.6% at the end of the prior quarter. During that period, 3M LIBOR fell by approximately 200 bps, beginning the year at 4.7% and ending Q1 2008 at 2.7%.
- ❖ **Life-to-Date Net Loss Reserves:**⁽²⁾ Excess loss reserves increased, with approximately \$116 million of excess loss reserves having been factored into our IRR calculations as of March 31, 2008. At the end of the 2007, excess loss reserves were \$106 million.

(1) TFG invests substantially all its capital through a master fund, Tetragon Financial Group Master Fund Limited ("TFGMF"), in which it holds a 94% share. Tetragon Financial Group LP (TFGLP), a U.S. "feeder fund", holds the remaining 6.0% interest in TFGMF. TFG and TFGLP receive a pro-rata allocation of the performance of TFGMF.

(2) The life-to-date net loss reserve is transaction-specific. It is calculated by subtracting the actual collateral loss for each transaction from the expected collateral loss, where the expected loss is a function of expected collateral size, TFG's loss assumptions and the length of time the investment has been held.

TETRAGON

TETRAGON FINANCIAL GROUP LIMITED (TFG)

PORTFOLIO AND MARKET COMMENTARY FOR Q1 2008

- ❖ **Leverage:** Overall corporate leverage was slightly reduced. As of the end of Q1 2008, net borrowings (total borrowings less cash and amounts due from brokers) were approximately \$153 million, down from approximately \$186 million at the end of 2007.
- ❖ **Incentive Fee:** The Q1 2008 Incentive Fee paid to the Investment Manager was \$2.4 million after recouping the Q4 2007 loss of \$0.11 per share. Furthermore and also in accordance with the investment management agreement and as described in TFG's Audited Financial Statements, beginning in Q2 2008 the fixed 8% "Hurdle Rate" used to calculate the Incentive Fee has been replaced by a LIBOR based calculation. The Hurdle Rate for Q2 2008 is 5.3316% based on 3M USD LIBOR determined as of 11:00 a.m. London time on April 1, 2008 and a "Hurdle Spread" of 2.647858%.

Portfolio Summary:

- ❖ **Portfolio Size:** As of the end of Q1 2008, the investment portfolio totaled \$1.4 billion, with exposure to approximately \$17 billion of leveraged loans. No new investments were made during the quarter.
- ❖ **Portfolio Composition:** The portfolio consists of 61 collateralized loan obligation investments managed by 32 CLO managers.⁽³⁾

Market Summary:

- ❖ **Market Default Rate:** Institutional loan defaults increased in Q1 2008 after a benign 2007. According to S&P, 13 institutional loans defaulted during the quarter⁽⁴⁾ increasing the lagging 12-month default rate by principal amount to 1.1%. TFG's lagging 12-month corporate loan default rate by comparison ended the quarter at 0.8%, 28% below the market rate.
- ❖ **CLO Issuance:** Global CLO issuance for Q1 2008 amounted to approximately \$16 billion, down from approximately \$63 billion during the first quarter of 2007.⁽⁵⁾ The new issue market was most active in March, as approximately \$13 billion of leveraged loan and middle market CLO transactions were issued during the month.⁽⁵⁾

TFG Outlook:

- ❖ Loan market technicals remained weak during the first quarter. We believe that this allowed our CLO managers to increase the credit quality of our loan portfolios without sacrificing par or incurring significant trading losses, as they were able to swap weaker credits for stronger ones trading at similar levels. Wider loan spreads and the ability of our managers to purchase what they feel are "money-good" loans at below-par prices may also enable our investments to outperform during an increasing default environment. As

(3) Excludes CDO-squared and ABS CDO transactions which were written off in October 2007. TFG continues to hold the economic rights to these written-off transactions.

TETRAGON

TETRAGON FINANCIAL GROUP LIMITED (TFG)

PORTFOLIO AND MARKET COMMENTARY FOR Q1 2008 (CONTINUED)

the cost of funding for our loan exposures, through our CLO investments, is fixed for the life of each transaction, widening loan spreads or below-par purchases can serve as a cushion against future losses. We think that this aspect of our portfolio may differentiate us from other loan market participants as loan defaults increase.

- ❖ We believe that we have invested with superior portfolio managers based on their track records and expertise and that such managers will enable our CLO investments to outperform the loan market default rate over the life of each transaction.
- ❖ Our capital is presently fully invested which we believe allows us to be discriminating investors. Currently, we are seeking to accumulate cash and/or pay down the Company's outstanding financing. Notwithstanding the Company's reduced leverage, returns may be relatively unaffected or even improve if loan spreads remain stable or widen further. We believe that this strategy of accumulating cash and/or paying down outstanding financing is a prudent one, especially as we continue to seek appropriate investments. We will continue to monitor both the primary and secondary market for potential investments as we weigh the benefits of repaying our existing financing, holding additional cash and investing in new opportunities.

Quarterly Investor Call

We will host a conference call for investors on Wednesday, April 23, 2008 at 15:30 BST/16:30 CEST/10:30 EST to discuss Q1 2008 results and to provide a company update. The conference call may be accessed by dialing +44 (0)20 7162 0025 and +1 334 323 6201 (a passcode is not required). Participants may also register for the conference call in advance by going to <https://eventreg1.conferencing.com/webportal3/reg.html?Acc=492230&Conf=154815> or by going to the TFG website, www.tetragoninv.com.

⁽³⁾ Equivalent to Investment in Securities at Fair Value in the US GAAP Financial Statements.					
⁽⁴⁾ Investments at Amortized Cost less interest accrued since last payment date. Internal Rate of Return (IRR) x Amortized Cost B/Fwd determines CDO income.					
⁽⁵⁾ Equals CDO Amortized Cost B/Fwd / Book Value.					
⁽⁶⁾ Calculated as a percentage of total Loan Assets that Tetragon has exposure to net of any single name CDS hedges held against that credit. The value of both the Loan Credit and the Total Loan exposure are calculated at cost of purchase.					

TETRAGON

TETRAGON FINANCIAL GROUP LIMITED (TFG)

PERFORMANCE SUMMARY AS OF MARCH 31, 2008

Notes:

- (1) August 2005 - June 2006 performance reflects illustrative performance using Class A share performance and adjusting to reflect Class C levels of management and incentive fees.
- (2) July 2006 - March 2007 performance reflects actual per share performance for Class C Shares (1.5% management fee, 25% incentive fee over a hurdle rate of 8%).
- (3) April 2007 reflects Earnings per Share (EPS) based on average shares in issue in the month, after translating pre-IPO shares into post-IPO equivalents.
- (4) May 2007 onwards reflects EPS based on post-IPO shares only.
- (5) Pre-IPO TFG was a non-distributive open-ended unlisted entity, where investors subscribed for and redeemed shares at NAV. Under these conditions it is common practice to measure performance as a percentage return to NAV. Post-IPO, in line with market practice, earnings per share (EPS) is a more appropriate measure of performance.

An investment in TFG involves substantial risks. Please refer to the Company's website at www.tetragoninv.com for a description of the risks and uncertainties pertaining to an investment in TFG.

This release does not contain or constitute an offer to sell or a solicitation of an offer to purchase securities in the United States or any other jurisdiction. The securities of TFG have not been and will not be registered under the US Securities Act of 1933 (the "Securities Act"), as amended, and may not be offered or sold in the United States or to US persons unless they are registered under applicable law or exempt from registration. TFG does not intend to register any portion of its securities in the United States or to conduct a public offer of securities in the United States. In addition, TFG has not been and will not be registered under the US Investment Company Act of 1940, and investors will not be entitled to the benefits of such Act. TFG is registered in the public register of the Netherlands Authority for the Financial Markets under Section 1:107 of the Financial Markets Supervision Act as a collective investment scheme from a designated country.
