(i) This table includes the income and expenses attributable to TFG Asset Management's businesses, (with the exception of BentallGreenOak) during that period. During 2021, Equitix repaid all of its shareholder loans and, as a result, TFG Asset Management's rights to distributable income reduced from 85% to 75%. In the table above, 100% of Equitix's income and expenses are reflected and 25% of Equitix's income and expenses are reversed out through the Non-TFG Asset Management-owned interest line, being the proportion not attributable to Tetragon (2020: 15% of Equitix's income and expenses were reversed out through the Non-TFG Asset Management owned interest line). Similarly, 100% of the income and expenses from Acasta Partners, in which TFG Asset Management has a non-controlling interest, are reflected above with the percentage not owned by TFG Asset Management reversed out through the Non-TFG Asset Management owned interest line. BentallGreenOak EBITDA is not included, but distributions relating to ordinary income and carried interest are included. The EBITDA equivalent is a non-GAAP measure and is designed to reflect the operating performance of the TFG Asset Management businesses rather than is or what was reflected in Tetragon's financial statements.

(ii) The performance and success fees include some realised and unrealised Polygon and Acasta performance fees. These represent the fees calculated by the applicable administrator of the relevant funds, in accordance with the applicable fund constitutional documents, when determining NAV at the reporting date. Similar amounts, if any, from LCM are recognised when received. Tetragon pays full management and performance fees on its investments in the open Polygon and Acasta funds. Success fees also include fees earned by Equitix on successfully completing certain primary projects and delivering de-risked investments into their secondary funds; these are recognised once Equitix is entitled to recover them.

Average RoE is calculated from Tetragon's IPO in 2007. Tetragon seeks to deliver 10-15% RoE per annum to shareholders. Tetragon's returns will most likely fluctuate with LIBOR or an equivalent risk-free short-term rate which directly flows through some of Tetragon's investments and therefore in high-LIBOR environments, Tetragon should achieve higher sustainable returns; in low-LIBOR environments, Tetragon should achieve lower sustainable returns. Please note that (i) from 31 December 2021, LIBOR has been replaced by an appropriate alternate rate as advised by ISDA in the IBOR Fallbacks Protocol, although certain LIBOR settings will continue to be calculated and published using panel bank submissions until 30 June 2023, and (ii) LIBOR will no longer be available beginning 1 July 2023, and the market generally is replacing LIBOR with the Secured Overnight Funding Rate (SOFR), which tracks the interest rate on borrowings collateralized by U.S. Treasury securities.
